Finishes: mahogany, walnut, ebony,
natural maple
Soundboard: Fiemme Valley Red Spruce

The Ana harp distinguishes itself from the other more traditional Celtic harps both by the way it looks, the tension, and the spacing between the strings which makes it similar in sound and feel to the Salvi pedal harp line. This harp is an excellent choice for students who are thinking of progressing to the pedal harp and for harpists who wish to play a lever harp but achieve a sound similar to a small pedal harp.
